Intercim Announces Australia-based Memko to Resell its Pertinence Suite powered by Velocity in Asia Pacific

ST. PAUL, Minn. – October 31, 2008 – Intercim LLC, a global leader in manufacturing and production operations management software solutions for advanced and highly regulated industries, announced today that Memko, an Australian-based organization providing services and products to the aerospace, aviation and defense industry, will resell its Pertinence Suite powered by Velocity solution in the Asia Pacific region.

As Intercim President and CEO John Todd notes, "Customers all over the world have benefitted from our solutions, as evident by the recent 100,000 users milestone the company reached. To date, the vast majority of our users have been located in North America and Europe, but we recognize there is a great need for our solutions in the Asia Pacific region and are delighted to have partnered with Memko to assist us in entering that market."

Launched in 2007, Memko is a fast developing company with in depth expertise in the aerospace and defense industry. Based in Australia, it offers customers engineering support as well as technology development and implementation assistance.

"Prior to founding Memko, I had the opportunity to work with some of the Pertinence Suite modules," said Memko Founder and Director Miro Miletic. "I was impressed by its predictive analysis capability, which offers manufacturers a totally new way of understanding and preventing quality defects before they happen, improving yield while decreasing the cost of rework and scrap. In today's challenging environment where pressure on cost reduction increases everyday, there is a great need to reduce time to market for complex materials. Intercim's solutions help address this need to detect, and fix, issues before they get too far down the manufacturing line. We're looking forward to working with such a forward-thinking company and representing its products to the Asia Pacific market."

About Pertinence Suite powered by Velocity

Pertinence Suite is the first true end-to-end manufacturing operations solution developed with Operational Excellence in mind. The Suite supports all Lean, Six Sigma and other process initiatives implemented throughout the world. From simplified process planning and advanced predictive analysis to best-in-industry process execution and quality management, the Pertinence Suite helps customers reach their operational goals in a very short time.

About Intercim

Intercim has 25 years of experience in helping discrete manufacturers meet regulatory requirements, harness lean principles, manage quality and execute processes in a paperless environment. The company is a demonstrated leader in manufacturing and production operations management software solutions for advanced and highly regulated industries. Intercim has offices throughout the United States and in Europe, with industry-leading customers such as Boeing, Sanofi Pasteur, Airbus, Ball Aerospace, BMW and Honeywell. In addition, as part of its initiative to provide the utmost in operational excellence, the company also has technology partnerships with Dassault Systèmes, SAP and Microsoft.
