

ICAM Signs Dealership Agreement with MEMKO

Montreal, March 11, 2010 – ICAM Technologies Corporation (ICAM), headquartered in Montreal, Canada, announces the signing of a Dealership Agreement with Australian-based MEMKO PTY LTD (MEMKO) to provide local Australian customers, running primarily CATIA V5, with advanced ICAM NC post-processors, machining simulation and technical support services.

MEMKO was chosen by ICAM, because of its vast NC manufacturing experience particularly within the CATIA V5 CAD / CAM market and expert knowledge of ICAM's complete product catalogue.

ICAM develops and delivers industry leading manufacturing software and services specializing in NC post-processing solutions that support the most popular CAD / CAM systems, machine tools and controllers for manufacturers in major industries around the world.

ICAM's product suite includes CAM-POST® for NC post-processor development with the option for integrated machine tool simulation using Virtual Machine®. ICAM also supports machine code data verification driven with Control Emulator™ inside Virtual Machine or CATIA / DELMIA V5.

ICAM's customers benefit from dramatic improvements to CNC machine optimization, NC programmer productivity and manufacturing process efficiency. ICAM's unique technology and services provide its customers and industry partners with the competitive edge that their business operations and customers demand.

About MEMKO PTY LTD

Founded in 2007, MEMKO PTY LTD offers services and products specifically tailored to the requirements of Aviation, Aerospace and Defense organizations, public or private to develop synergies through the integration of advanced technology and processes, business systems, and organizational skills and structure. For more information visit www.memko.com.au.

MEMKO staff have extensive engineering, quality, manufacturing and management capabilities supporting business in matters relating to:

- strategic planning and business development
- regulatory approvals and maintenance and repair station processes
- engineering and technology services
- supply chain management
- continued engineering and technical training
- lean product development and manufacturing training

About ICAM Technologies Corporation

For over 35 years ICAM Technologies Corporation has been specializing in the development and implementation of advanced NC post-processing solutions for manufacturers in major industries around the world. ICAM has added an integrated machine tool simulator, Virtual Machine®, with the provision for Machine Code Data (MCD) verification driven with ICAM Control Emulator™ to its product mix that further strengthened its position in the NC manufacturing market. ICAM customers benefit from dramatic improvements to CNC machine optimization, NC programmer productivity and manufacturing process efficiency. ICAM's unique technology and services provide its customers and industry partners with the competitive edge that their business operations and customers demand.
